

AAFAQUE RASHEED

Full Stack Developer • Python • AI / LLM Applications

Seattle, WA (Open to Relocation) | 425-652-0071 | aafaquerasheed@gmail.com | [LinkedIn](#)

SUMMARY

Full Stack Developer with 2+ years building production web applications, AI-powered dashboards, and analytics platforms end to end — Python back ends (Flask, NestJS, Streamlit), TypeScript/Angular front ends, and SQL/NoSQL data layers. Strong in REST API design, data visualization, and LLM/RAG-driven features, with hands-on AWS deployment and CI/CD. Proven ability to translate business requirements into scalable, production-ready solutions while shipping fast with modern AI-assisted tooling.

PROFESSIONAL EXPERIENCE

Full Stack Developer / Product Lead

Jan 2024 – Present

Soulstice Dating

Dallas, TX

- **Built and shipped full stack features across 40+ screens** using Angular, TypeScript, Streamlit, HTML, and CSS, delivering responsive, user-friendly interfaces that improved usability and scaled with product growth.
- **Designed and deployed 10+ RESTful APIs** with Python (Flask) and NestJS, improving backend integration and cutting average response times by 20%.
- **Developed interactive analytics dashboards and internal web apps** in Python/Streamlit, integrating REST APIs to surface real-time operational metrics, with reusable visualization modules improving consistency across tools.
- **Engineered MongoDB and SQL data workflows** powering reporting dashboards, enabling efficient real-time data retrieval and self-serve business analytics.
- **Implemented an automated CI/CD pipeline** deploying to AWS EC2, reducing manual releases for faster, more reliable rollouts.
- **Accelerated development, debugging, and prototyping** with AI-assisted tools (Claude Code, Cursor, Windsurf) while maintaining clean, production-ready code.
- **Led code reviews and contributed to architecture decisions**, and partnered with product, design, and engineering to turn business requirements into scalable solutions.

IT Support Engineer

Jun 2015 – Aug 2018

Delhi Metro Rail Corporation

New Delhi, India

- **Supported technical reporting, operational tracking, and project-coordination workflows** with data-driven tools across large-scale infrastructure initiatives serving millions of annual commuters, working with CAD, GIS, and project-management platforms.
- **Analyzed operational and project data and managed full project-lifecycle tracking**, standardizing documentation templates across stakeholders and government agencies to ensure compliance and keep timelines on schedule.

PROJECTS

Kickoff Insights — Streamlit RAG Chatbot (Python, LangChain, FAISS, Groq LLM)

- Built an interactive RAG chatbot in Streamlit that ingests PDFs and crawls websites, generates Google Generative AI embeddings, indexes them with FAISS, and uses a Groq LLM (via LangChain ChatPromptTemplate and document-combining chains) with targeted prompt engineering to deliver concise, source-grounded answers.
- Added a Streamlit itinerary planner integrating flight and FIFA/ticket-provider APIs, with cost/time optimization, Redis caching, and secrets management via st.secrets, rendering exportable, bookable travel itineraries in-app.

ETL Pipeline for E-Commerce Data (PySpark, PostgreSQL, Apache Airflow)

- Built an automated ETL pipeline extracting product and order data from APIs, transforming it with PySpark, and loading it into PostgreSQL for analytics; orchestrated with Apache Airflow to double data freshness and cut manual effort.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++, SQL

Frontend: Angular, React, React Native, Streamlit, HTML, CSS, Flutter

Backend: Flask, NestJS, Express, REST APIs, SQLAlchemy

Databases: PostgreSQL, MongoDB, MariaDB, Oracle, Firebase

Cloud & DevOps: AWS (EC2, S3, Lambda, Cognito), CI/CD, Git, GitHub, Bash

AI / ML: LLMs, LangChain, RAG, Vector Databases, Prompt Engineering, FAISS; AI-assisted dev (Claude Code, Cursor)

Data & Methods: PySpark, Apache Airflow, Tableau; Agile (Scrum), Waterfall

EDUCATION & CERTIFICATIONS

M.S., Information Technology and Management (MSITM)

2023 – 2025

University of Texas at Dallas — Dean's Excellence Scholarship & Pandian Fellowship recipient

Relevant coursework: Python OOP, Big Data & Cloud, Data Science & Analytics, Databases, Systems Analysis, Cybersecurity.

AWS Certified Cloud Practitioner (Validation No. W6SEXFQBSJBQQNCO)
